RHINOPLASTY FROM 3 WORLD LEADING SURGEONS

PROF. DR. WOLFGANG GUBISCH

DR. ENRICO ROBOTTI

PROF. DR. NAZIM CERKAS

Rhinoplasty from 3 world leading surgeons

31 May - 01 June 2019

Educational and Counseling Center EdMed in association with the Beauty Institute and Russian Society of Plastic, Aesthetic and Reconstructive Surgeons (SPRAS) are glad to invite you to attend the Course «Rhinoplasty from 3 leading surgeons».

Without any doubts, rhinoplasties are one of the most challenging aesthetic procedures. They are complex because they have a functional and an aesthetic aspect at the same time. A good result can only be achieved if both aspects are well respected. Also, the nose is the center of the face and has a huge effect in terms of self-confidence for many individuals. If a rhinoplasty fails, the result cannot be camouflaged easily. Therefore, it is a big challenge and leads to the fact, that rhinoplasties have one of the highest failure rates from all aesthetic procedures. These problems can only be prevented by an intensive training in analyzing and selecting patients adequately to its own surgical abilities. The objective of this very special meeting is to educate colleagues, who have a great interest in rhinoplasty and to demonstrate proved surgical techniques for primary and secondary cases to them. The course also provides and encourages the participants to discuss existing or upcoming questions directly with these very experienced surgeons so that a fruitful and beneficial discussion can arise for everybody.

Welcome speech from Prof. Dr. med. Dr. h.c. Wolfgang Gubisch

Dr. Enrico Robotti, MD

Expert

Adjunct Professor at the School of Specialization in Plastic and Reconstructive Surgery of the Universities of Turin and Milan,

Member of the Education Council of ISAPS (International Society of Plastic, Reconstructive and Aesthetic Surgery),
